

# APS-1 Actuator Position Sensor

For controls requiring actuator feedback

Phason's Actuator Position Sensor is device that provides potentiometer feedback to an inlet actuator controller.

The APS-1 sends electronic signals to the control. The control uses the signals to determine the position of the inlet and how much to open or close it.

The APS-1 is easy to install and can be mounted in a variety of positions to suit your requirements.

## Features

- ◆ Easy installation
- ◆ Rugged enclosure
- ◆ 90-day limited warranty

## Other requirements and information
